

2. Meeting Feedback (6 May 2026) — Response Summary

#	Feedback received	Status in v30	Where addressed
1	Integrate the banking concept more clearly and prominently throughout the report and architecture	Addressed	Six core banking functions (Ch. 1); full banking product suite (Ch. 3); deposit mobilization, liquidation, savings, FX, insurance (Ch. 3 & appendices); market/competitive framing as a <i>banking platform</i> not only a lending protocol (Ch. 5)
2	Add missing lists (figures, tables, abbreviations)	Addressed	Table of Contents, List of Tables, List of Figures; new List of Formulas and List of Abbreviations (60+ entries); expanded figure/table inventory
3	Fix text visibility issues in tables	Addressed	Migration from image-only table PNGs to native LaTeX tables with <code>booktabs</code> , column width control, <code>\footnotesize</code> , ragged-right <code>p{}</code> columns, and post-table context notes; appendix tables (e.g. D.1, Appendix C manifest) resized to page width
4	Add functionality to lend and fund a group of entities	Addressed (design/specification)	<code>GroupLendingPool</code> (retail solidarity / mutual liability); <code>SyndicatedLoan</code> , <code>TranchedPool</code> , <code>TreasurySwap</code> , <code>NettingEngine</code> (institutional co-lending/co-funding); multi-entity cross-tier operations (Ch. 3, Conclusion)
5	Use standard ER notation (Crow's Foot or Chen) consistently	Addressed	ERD/EER figures and captions explicitly state cardinality, participation, generalization/specialization, weak entities, and aggregation; entity-relationship figures updated (e.g. core ERD, extended ERD, EER model) with consistent relational notation in captions and Chapter 3 data-model prose
6	Include descriptions alongside each table for context	Addressed	Context paragraphs after major tables using <code>\noindent\textit{\small ...}</code> blocks (market sizing, competitive landscape, governance, ML features, regulatory mapping, etc.); table captions expanded beyond image placeholders

#	Feedback received	Status in v30	Where addressed
7	Demonstrate deeper conceptual understanding of blockchain, smart contracts, and DeFi	Addressed	New Blockchain, Smart Contract, and DeFi Fundamentals subsection (Ch. 2); expanded DeFi-vs-banking contrast; EVM execution model, oracle problem, gas/CEI patterns; Chainlink oracle stack; formal contribution statements with scope honesty
8	Expand references beyond IEEE — ACM, Springer, arXiv, DeFi whitepapers	Addressed	Bibliography grew from ~ 55 entries (v5) to 147 entries (v30), spanning ACM, IEEE, Springer, Elsevier, BIS, World Bank, IMF, arXiv, EIP/ERC standards, OWASP, EU MiCA/GENIUS Act, and protocol documentation (Aave, Compound, Chainlink, etc.)
