

RQ2: latency & gas
measurement plan

Latency targets

FastAPI /score: RF + IF +
stacking < 50 ms (laptop)

Chainlink Functions oracle:
5-30 s, ~\$0.10-\$1.00 / call

ML scored at origination
only (not per installment);
score caching + batch
scoring for groups

Gas measurement

Per-function gas: disburse,
repay, allocate, commit-
reveal

300-client Foundry
simulation (deterministic
seed)

Gas-cost table in Appendix
C (Phase IV)
