

Planned for final phases (Should)

9. 300-client
Foundry
sim or gas-cost table

10. Open-source
repo
README +
reproducible run

12. LLM evaluation
protocol (task /
action / zero-
bypass)

Design / partial

7. Commit-reveal
score before
approval (design)

8. BCCC benchmark
table (synthetic
validation now)

Specified at pre-thesis (Must by final thesis)

1. Bank contracts
deployed
(Amoy / Sepolia)

2. Loan E2E:
request
→ approve →
disburse → repay

3. Reserve / limit
enforcement
on-chain

4. FastAPI ML
score:
RF + IF + stacking

5. SHAP + anomaly
report +
Authority Brief UI

6. LOAN_RISK_
ASSESSMENT
row per inference

11. MCP agent:
3-5 tools + chat
+ confirm gate
